

# Long-Term Care Facility Providers

Webinar:

## **A Review of PENNSYLVANIA DEPARTMENT OF HEALTH 2021 – PAHAN – 569 – 4-30 - UPD UPDATE: Work Restrictions for Healthcare Personnel with Exposure to COVID- 19**

Friday, August 6, 2021

9:30 am – 10:30 am

COVID-19 infection rates are projected to increase in Pennsylvania due to a number of factors. There is concern that this increase in infections will exacerbate the already straining staffing capacity of long-term care facilities. To ensure that we are prepared to support some of the most vulnerable populations, Holly Simpson from the Pennsylvania Department of Health will present a review of the information contained in [PA HAN 569](#). This review will include topics such as: defining a “high-risk” exposure for healthcare personnel (HCP), how and when work exclusion for HCP should occur, testing strategy for HCP, and criteria for reducing work exclusion for HCP to mitigate staffing shortages.
