

Linking Existing Data Systems to the Health Risk Screening Tool (HRST) Survey

ODP Announcement 22-058

AUDIENCE:

All Providers

PURPOSE:

To announce the launch of the Health Risk Screening Tool (HRST) survey to assess interest in linking data systems to the HRST.

DISCUSSION:

Please assist the Office of Developmental Programs in completing [a survey](#) developed by IntellectAbility related to the Health Risk Screening Tool (HRST). The survey will help to determine providers' level of interest in **linking existing data systems to the HRST**. This is an inquiry survey only and is intended to gauge provider interest. The survey should take a few minutes to complete.

Linking existing data would enable select data fields to autofill with data from these data systems on a routine frequency, thus reducing the amount of duplicate data entry. The criteria for this service are outlined in this survey; please review the criteria carefully. You may need to consult with your IT personnel or your data system representative(s) to help determine if your agency can meet these criteria. This data import option would only be available to providers who meet all of the criteria listed.

This survey will remain open for responses until Friday, June 10th 2022.
