

## **Residential Individual Support Plan (ISP) Training for Program Specialists – Recorded Training Available**

### **ODP Announcement 24-049**

#### **AUDIENCE:**

- Residential Program Specialists
- ODP Residential Providers

#### **PURPOSE:**

To announce that the recording of the live virtual training sessions held in February and March 2024 regarding implementation of the Residential ISP Staffing approach for Program Specialists is now available on MyODP.

#### **DISCUSSION:**

The recorded training session is provided for Residential Provider Program Specialists who contribute to ISP development but were unable to attend the live, virtual training.

The training focuses on Program Specialist expectations in ISP development and ensuring consistent, statewide implementation of the Residential ISP Staffing approach. Program Specialists are responsible for providing critical and up-to-date information to the ISP team so that the ISP is person-centered and mitigates risks to health and safety.

All participants must complete the current prerequisite online training

([\*\*Residential ISP Staffing: It's About the Person, Not the Numbers\*\*](#)) before being able to view the recordings.

- If you previously completed the prerequisite training, you will automatically be able to access the course.
- If you have not completed the prerequisite training, you will see a notice that you can enroll in the training course after completing the prerequisite training. A link to the prerequisite training is also provided.

The recorded training, resources, and step-by-step instructions to complete the online training are available in the course - [\*\*Residential ISP Staffing for Program Specialists\*\*](#).

The recorded training has two parts with a total running time of 2 hours, 44 minutes.

Program Specialists who complete all training requirements may obtain a Certificate of Achievement.
