This template:

- Helps with documentation of **all activities in one place**
- Is **universal** – can be used to monitor/analyze whatever you want
- Is **modifiable** - use it as-is or change it to make it fit what you need
- Includes **analysis tool** to help consider components for a more complete analysis
- Includes **hyperlinks** to online support for Excel and HCSIS Learning (LMS)
- Helps you think through your data monitoring and analysis setup – includes **necessary components to be effective** – use it or build your own, but ensure that you include everything you need to be complete and effective
