

Pennsylvania Technology Solutions Specialists

Profiles and Contact Information

Quinn Crispell

Location

Swoyersville, PA

Email

mightyquinn9703@gmail.com

My skills and expertise:

I am a full-time college student and I am an experienced public speaker.

Why I became a Technology Solutions Specialist:

The most important part of my work as a Technology Solution Specialist is helping people with disabilities know what kind of technology is available them in their daily lives.

Bobby Evans

Location

Downingtown, PA

Email

revans0614196@gmail.com

My skills and expertise:

I have skills with computers and working with phones if you need any help with technology. I'm your guy when it comes to tech!

I am also a great speaker on technology.

Why I became a Technology Solutions Specialist:

It's important to me to work with co-workers and people with disabilities to make their technology better for them. I bring a lot of skills to the table.

Gretchen Laudenslager

Location
Quakertown, PA

Email
glaundenslager@
sau1.org

My skills and expertise:

I am a public speaker, organized, friendly, outgoing, and approachable.

Why I became a Technology Solutions Specialist:

The work of being a Technology Solutions Specialist is important because I have learned about different technologies. I will be able to pass along what I have learned to other people with a disability. My hope is that learning about technology will improve other people's lives.

Chris Moore

Location
Wyncote, PA

Email
cmm.11640@gm
ail.com

My skills and expertise:

My skills include public speaking, working in a team, basic computer skills, and Microsoft Excel spreadsheet knowledge

Why I became a Technology Solutions Specialist:

Being a Technology Solutions Specialist is an opportunity to give back to my community. I feel that people don't necessarily know how accessible and impactful technology can be when used right. People with disabilities and providers should know how to use certain technologies to make individuals lives easier.

Joseph Reisner

Location
Philadelphia, PA

Email
josephreisner12@gmail.com

My skills and expertise:

I have skills in disability advocacy, graphic design, animation, video editing, public speaking, accessibility review, and sharing about my experiences with technology solutions. I am passionate about telling stories through the use of computers.

Why I became a Technology Solutions Specialist:

I have learned that I enjoy being helpful, enthusiastic, innovative, and motivated to help society. I look forward to using my strengths and Technology Solutions Specialist skills to make today's technology easier to use for disabled individuals throughout the state of Pennsylvania.

Andre Rhone

Location
West Mifflin, PA

Email
andrerrhone02@gmail.com

My skills and expertise:

If I had to name my greatest skill, it would be my compassion—especially when it comes to self-expression.

I don't believe being "woke" is a bad thing. To me, it means staying aware, listening deeply, and caring about how others experience the world.

Why I became a Technology Solutions Specialist:

The work I do holds deep meaning for me.

It's rooted in my personal journey of living with a disability and my commitment to breaking down the stigmas that surround it. I believe in the power of community—of people showing up for each other, not just waiting on government support. I want to see private investors and everyday individuals step up to create real change, to invest in people, not just programs.

I see a lot of perspectives out there. Do I agree with all of them? No. But I believe every voice deserves to be heard, even when the beliefs are extreme or challenging. That doesn't mean I accept everything or align with every idea—but I won't cancel or shun someone for expressing themselves.

I'll always give honest feedback. I'm direct, but I'm also deeply open-minded. My goals may differ from others, but I believe in dialogue, not division.

Matt Smith

Location
Greenville, PA

Email
msmith
@sau1.org

My skills and expertise:

My skills include small group facilitation, relationship building, and one-on-one tailored instruction. I am an experienced advocate, proficient with plain language, disability culture-informed, neurodivergent inclusive, detail-oriented, and technology fluent.

Why I became a Technology Solutions Specialist:

Learning about technology allows me to advocate for its widespread use, and can help more people get what they need.

Nae Vallejo

Location
Philadelphia, PA

Email
nae.vallejo
@gmail.com

My skills and expertise:

I bring a mix of storytelling, teaching, accessibility and cultural humility practice. I am comfortable translating complex or technical ideas into plain language, step-by-step guides, or easy-read formats.

I also bring experience in public speaking, facilitation, and community organizing-skills that help me create space-time portals where people feel seen and included.

My lens as a Black, queer, neurodivergent, disabled person shapes how I approach solutions: with creativity, care, and a focus on equity. Alongside this, I do well with visual creations-icons, sketches, and design elements-that make information more accessible and engaging.

Why I became a Technology Solutions Specialist:

The work matters to me because technology can be a bridge-opening doors that systems too often keep closed. As someone rooted in disability justice and village care, I know tools are never neutral. When we design and share technology with intention, it can mean access to safety, connection, creativity, and dignity. Being a Technology Solutions Specialist allows me to further support people in finding tech that actually fits their lives, rather than forcing them to fit into tools that weren't made with them in mind.
